Amina Meme Token (AKM) - Whitepaper

1) Introduction

Amina Meme Token (AKM) is not just a token; it's a digital satire on the meme economy, crowned with humor and driven by a vibrant community. While it doesn't promise revolutionary tech or overnight wealth, it offers pure entertainment, social engagement, and a chance to be part of a collective joke that might just go viral.

2) Token Overview

2.1) Name: Amina Meme Token

2.2) Symbol: AKM

2.3) Total Supply: 850,000,000,000 AKM

2.4) Standard: ERC-20

2.5) Network: Polygon (Mainnet)

2.6) Network Gas: All transactions incur Polygon network gas.

2.7) Project Fee (Default): None. Standard `transfer()` and `transferFrom()` are fee-free.

2.8) Optional Fee Transfer: Only `transferWithFee()` charges 2%; 50% burned (0x…dEaD), 50% sent to the reward wallet.

2.9) Ownership: Contract is owned and managed transparently

3) Tokenomics

3.1) Total Supply: 850,000,000,000 AKM

3.2) Airdrop: 50,000,000,000 AKM

• For community awareness and promotion; distributed manually via Telegram.

3.3) Presale (PinkSale): 300,000,000,000 AKM

• Conducted via launchpad.

• Presale price: 1 AKM = 0.000085 USDT equivalent.

• Auto-liquidity will be provided after presale.

3.4) Staking & Rewards: 150,000,000,000 AKM

• A strong reward pool reserved for staking, vesting, and community incentives.

• Tokens may be added to the staking pool progressively.

3.5) Liquidity & Exchange Listings: 100,000,000,000 AKM

• Reserved for providing liquidity and supporting DEX/CEX listings.

• The initial liquidity may vary (e.g., 1B, 10B, or 100B), and community members can also contribute.

3.6) Development & Operations: 100,000,000,000 AKM

• For project development, operational costs, and ecosystem growth; subject to lock-up for transparency.

3.7) Community Treasury: 150,000,000,000 AKM

• Held for community initiatives, games, NFTs, and long-term use.

4) Community

4.1) Official Website: Main coordination hub: https://aminamemetoken.io

4.2) Twitter: Daily meme posts, updates, and engagement: ⊕ AminaMemeToken (@AminaMemeToken) / X

4.3) GitHub: Open-source development and transparency: ⊕ AminaMemeToken - Overview

4.4) Telegram: Official community group for announcements and discussions: ⊕ AminaMemeToken🍑👑

5) Security & Transparency

5.1) Contract: The AKM ERC-20 contract has been deployed on Polygon and the source code has been published on GitHub: ⊕ akm-token-nft-logo/AminaMemeToken.sol at main · AminaMemeToken/akm-token-nft-logo

• Deployed Address (Polygon): 0xB0409087265a8A7E002E41e4384B881Ba6A4175b

• PolygonScan: [https://polygonscan.com/token/0xB0409087265a8A7E002E41e4384B881Ba6A4175b]

5.2) Verification: The contract is verified on PolygonScan.

5.3) Ownership: Ownership is currently retained (not renounced); governance options may be considered with the community.

5.4) Fees: Default transfers are fee-free. Only `transferWithFee()` applies a 2% fee (50% routed to burn, 50% to the reward wallet).

5.5) Audit: A third-party audit is planned before presale; the report link will be provided.

5.6) KYC: KYC may be performed if required; status will be announced publicly.

5.7) Transparency: Official project wallets (treasury/reward/liquidity) and allocations are disclosed and kept up to date.

5.8) Optional: Lock/vesting schedules may be used for transparency; lock contract addresses will be published.

6) NFT Use

The logo has been minted as a unique NFT owned by the deployer. In the future, AKM holders may receive exclusive NFTs or participate in community minting events.

6.1) LogoNFT (1/1)

6.1.1) Standard: ERC-721 (ERC721URIStorage + Ownable, OpenZeppelin)

6.1.2) Supply: 1 unit (tokenId = 0)

6.1.3) Status: Verified on PolygonScan

6.1.4) Market Policy: Not for sale or listing; no marketplace approvals (setApprovalForAll=false).

6.2) Licensing & Branding

• The LogoNFT represents the official project logo; allowed for personal/visual display.

• Trademark and brand rights remain with the project; the NFT does not convey trademark ownership.

6.3) Addresses

6.3.1) LogoNFT Contract (Polygon): 0x58d31249A1cf940E183485DfA297E2656860a04d

6.3.2) Ownership: ownerOf(0) = 0x7Fa846bBD42B709113E86D29932067103d64bf00

7) Roadmap

Phase 0 — Setup

7.1) Contract Deployment

• Deploy AKM ERC-20, verify on PolygonScan, publish on GitHub, set reward wallet.

7.2) Documentation Pack

• Whitepaper v2.0, Terms, Privacy, Cookies; "no income promises" notices.

Phase 1 — Community & Awareness

7.3) Website Launch

• aminamemetoken.io with consistent design, disclaimers, and presale info.

7.4) Community Building

• X (Twitter), Telegram content plan and verified channels.

7.5) Airdrop (50B)

• Promotion-focused, manual distribution; anti-sybil measures.

Phase 2 — Compliance & Presale

7.6) Audit & KYC

• Third-party audit planned; publish reports; KYC optional.

7.7) Presale (PinkSale) — 300B

7.7.1) Price: 1 AKM = 0.000085 USDT equivalent.

• Soft/Hard caps and participation limits announced on PinkSale.

Phase 3 — Liquidity & DEX

7.8) Auto-Liquidity & DEX Listing

• Automatic liquidity after presale.

• Initial pool size may vary; community can provide additional liquidity.

Phase 4 — Staking & Listings

7.9) Staking & Vesting

• Launch staking pool; progressive emissions from the 150B rewards reserve.

7.10) CEX Applications

• Use the Liquidity & Listings (100B) reserve for listings and incentives.

Phase 5 — Ecosystem

7.11) Games & NFTs

• Entertainment-only mini games and community NFTs (no returns promised).

• Reference to the 1/1 LogoNFT and potential themed drops.

Note: The roadmap may evolve with community feedback and operational needs.

8) Disclaimer

8.1) Nature & Purpose: AKM is a meme token for entertainment and community engagement. This document is not financial advice.

8.2) No Rights Granted: Holding AKM confers no equity, dividends, revenue sharing, or governance rights by default.

8.3) Risks: Crypto assets are highly volatile and risky. You may lose all funds. Smart-contract bugs, third-party services (DEX/CEX, wallets, IPFS), network outages, and liquidity risks exist.

8.4) Compliance & Eligibility: Participation is subject to local laws; restrictions may apply. Taxes and legal obligations are the user's responsibility. KYC/Audit may be performed and will be disclosed.

8.5) Listings & Features:
•The project aims to apply for CEX listings, launch a staking pool, and ensure DEX listings as part of its roadmap.
•However, the approval and timing of these processes depend on third-party platforms.
•The team is committed to executing all plans transparently and in line with community expectations, but cannot guarantee specific outcomes.
•This approach follows international standards to avoid false promises and ensure long-term trust.

8.6) Fees & Burns: Default transfers are fee-free; a 2% fee applies only when transferWithFee() is used. Burns are optional and pre-announced.

8.7) NFTs: The LogoNFT and any future NFTs are for entertainment only; no yield or trademark transfer is implied.

8.8) Forward-Looking Statements: Roadmap and plans may change based on operational needs and community feedback.

8.9) Updates: This whitepaper may be updated periodically; the latest information will be announced via official channels.
