Privacy Policy

1. Information Collected

This website does not directly request personal information from users. However, when you visit the site, browser data, device type, and anonymous usage statistics may be collected automatically.

This information helps us improve our services and ensure optimal performance across different devices and browsers.

2. Wallet Connection

The AKM website does not collect or store wallet addresses. Presale is conducted via third-party launchpads (e.g., PinkSale), so no on-site wallet connection is required for presale participation.

If in the future optional features require wallet connection, the address will only be processed temporarily for verification purposes, without accessing balances or private keys.

3. Cookies

Our site may use cookies to enhance user experience. These cookies are stored in your browser to remember preferences and help improve site functionality.

You may disable cookies at any time through your browser settings. However, this may affect some features of our website.

4. Third-Party Links

Our website may contain links to third-party websites (such as Telegram, Twitter, GitHub). We are not responsible for the privacy practices of these external sites.

Please review their privacy policies separately before engaging with these platforms.

5. Security

Collected anonymous data is stored securely. Although no personal data is gathered on our website, we protect information that passes through our systems and take measures to prevent unauthorized access.

We implement industry-standard security practices to safeguard any information we process.

6. Right to Modify

This privacy policy may be updated periodically. Any changes will be published on this page. You are encouraged to check this page regularly for updates. Continued use of our services after policy changes constitutes acceptance of the updated terms.

7. Airdrop Addresses via Telegram

For airdrop participation, wallet addresses may be collected exclusively through our official Telegram bot. These addresses are used only for distributing airdrop rewards and preventing duplicate entries. We do not collect wallet addresses on our website.

Wallet addresses collected through our official Telegram bot for airdrop purposes are retained only until the distribution is completed. After this process, the data is deleted.
